
Needfinding

Key insights to find out the latent needs from various interviews conducted among teams working in different areas.

Kaggle Team(Pro)

Explaining concepts to one another(excellent mutual communication).

Were friends from a long time and had similar interests in data science.

Worked at the same place.

Kaggle Team(amateur)

Challenging to keep every teammate on the same page, results in attempting fewer competitions(decrease in the overall throughput).

College friends, share similar interests just starting it as a hobby

Academics tend to slow down the progress.

Consistency is difficult to attain.

Student(Engineering)

It is not always the best case scenario to get a team with similar interests.

generally prefers making teams with his friends so that communication is smooth.

Person working in industry

Projects are given a lot of importance for their high tolerance to failure in the real world.

Communication happens more on a professional note, but prefers some amount of informal communication can be used to make it smoother.
